

OPTIONAL PREMIUM ADD-ON

DEDICATED PROCESSING RESOURCES

RAPID4CLOUD PERFORMANCE PLUS

DEDICATED RESOURCES FOR FASTER PROCESSING

Give your Rapid4Cloud transformation and reporting workloads dedicated processing resources for faster, more consistent performance. As Rapid4Cloud automation scales across Oracle Fusion Cloud ERP and HCM environments, transformation and reporting workloads can require significant processing power. Performance Plus provides dedicated resources for this critical processing stage – helping reduce waiting time, improve throughput, and deliver a faster, more consistent automation experience.

Added to your existing Rapid4Cloud subscription.

DEDICATED RESOURCES

Processing capacity allocated exclusively for your workloads

FASTER PROCESSING

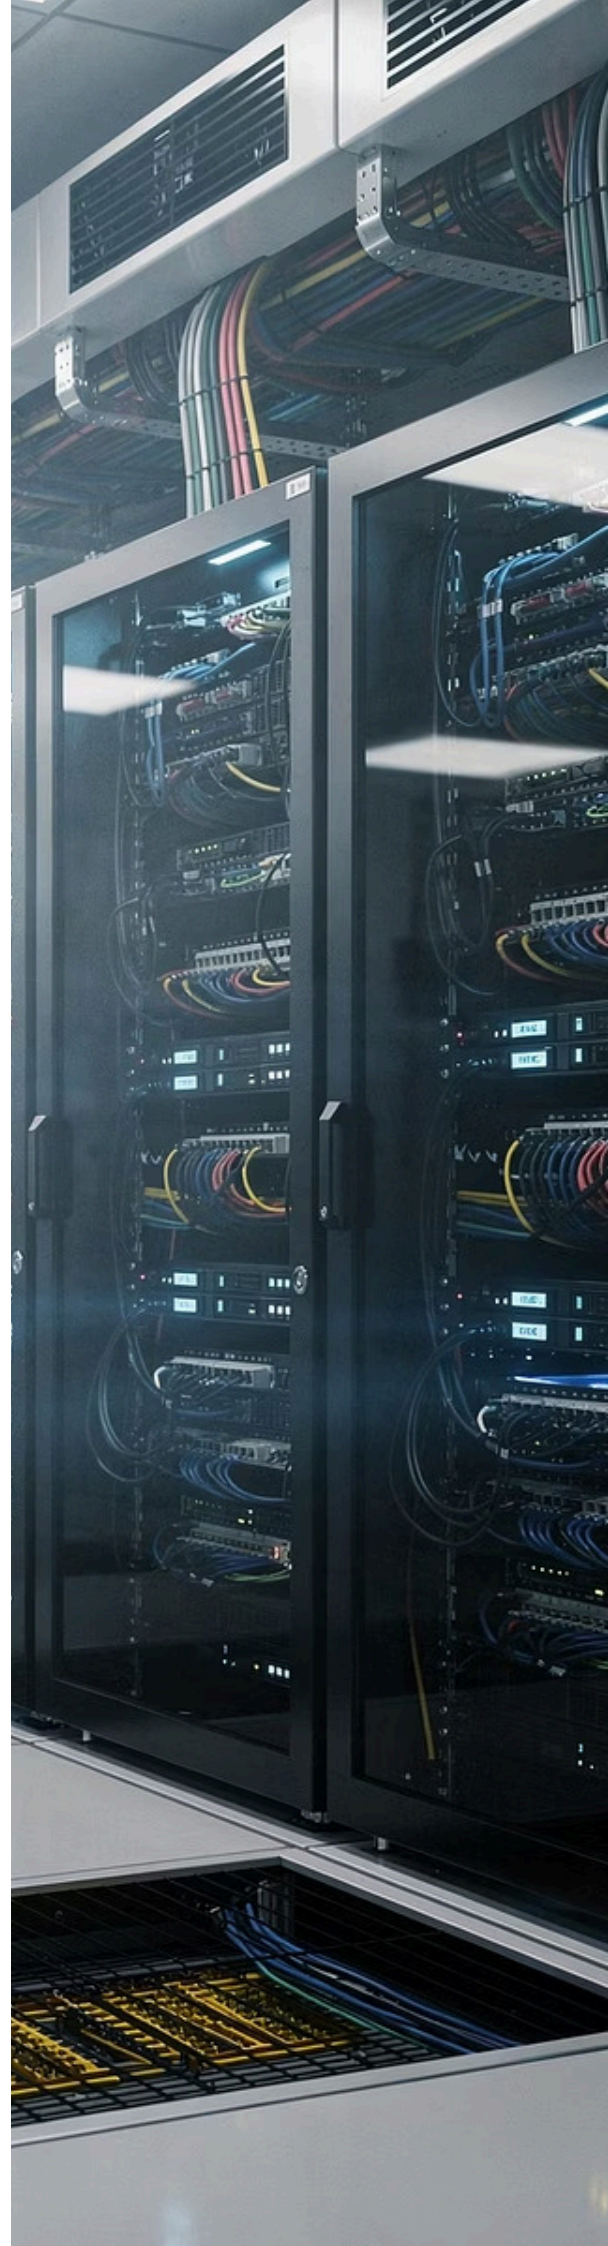

Accelerate transformation, reporting, and automation-preparation tasks

REDUCED WAITING TIME

Less queuing and delay between processing-heavy tasks

CONSISTENT PERFORMANCE

Predictable throughput for high-volume or recurring workloads

WHY PERFORMANCE PLUS?

Rapid4Cloud follows an Extract, Transform, Load approach. While extraction and loading are important, the transformation stage is often the most processing-intensive part of the workflow. This is where data is prepared, structured, enriched, validated, reported, and converted into automation-ready outputs.

For customers running large, frequent, or time-sensitive workloads, shared processing resources may lead to longer waiting times or variable processing performance. Performance Plus gives your organization dedicated processing resources for transformation and reporting workloads, helping your team move faster when demand is high.

 **Dedicated resources applied here:** Data preparation, structuring, validation, reporting, and automation-ready output generation – the most processing-intensive stage of the Rapid4Cloud workflow.

WHAT PERFORMANCE PLUS PROVIDES

DEDICATED PROCESSING RESOURCES

Dedicated capacity allocated for your organization's Rapid4Cloud transformation and reporting workloads.

FASTER PROCESSING

Helps accelerate processing-heavy transformation, reporting, and automation-preparation tasks.

REDUCED CONTENTION

Helps reduce delays caused by demand on shared processing resources.

CONSISTENT PERFORMANCE

Supports a more predictable processing experience for high-volume or recurring workloads.

IMPROVED THROUGHPUT

Helps process large or frequent requests more efficiently.

FULLY MANAGED

Rapid4Cloud manages the processing resources – no infrastructure management overhead for customer teams.

BUILT FOR PROCESSING-INTENSIVE WORKLOADS

Performance Plus is designed for the transformation and reporting engine – the part of the Rapid4Cloud workflow that typically requires the most processing power. The workloads below benefit most from dedicated processing resources.

BEST FIT FOR

HIGH-VOLUME RAPID4CLOUD USERS

Customers running frequent transformation, reporting, and automation-preparation workloads.

LARGE ORACLE FUSION CLOUD PROGRAMMES

ERP and HCM teams working across multiple environments, business units, countries, or legal entities.

TIME-SENSITIVE PROJECT TEAMS

Implementation, migration, testing, and support teams needing faster turnaround on processing-heavy tasks.

ENTERPRISE & MANAGED SERVICES TEAMS

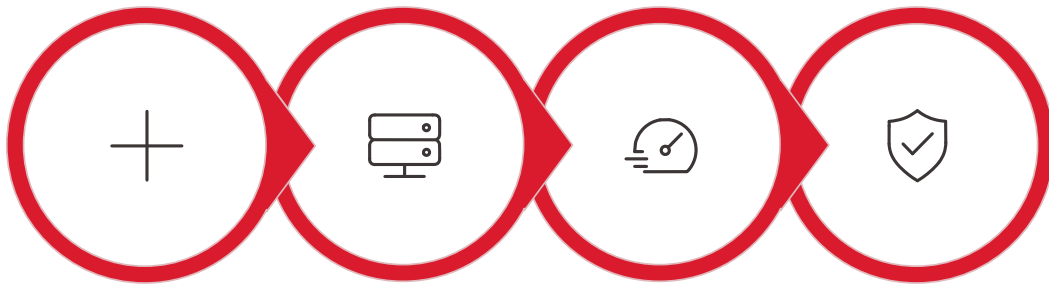

Organizations requiring consistent processing performance across customer, project, or operational workloads.

STANDARD PROCESSING VS PERFORMANCE PLUS

Feature	Standard Rapid4Cloud Processing	Rapid4Cloud Performance Plus
Processing resources	Shared processing resources	Dedicated resources for transformation and reporting
Best for	Typical Rapid4Cloud workloads	High-volume, frequent, or time-sensitive workloads
Resource contention	May vary with shared demand	Designed to reduce shared-resource contention
Processing speed	Efficient for standard workloads	Faster processing for transformation and reporting
Performance consistency	May vary with workload size and demand	More consistent for processing-intensive workloads
Management	Managed by Rapid4Cloud	Managed by Rapid4Cloud

 Performance Plus enhances the transformation and reporting stage of Rapid4Cloud processing. It does not replace your existing Rapid4Cloud subscription.

HOW IT WORKS

**ADD PERFORMANCE
PLUS**

**ALLOCATE
RESOURCES**

FASTER PROCESSING

R4C MANAGES IT

BENEFITS OF DEDICATED RESOURCES

- Reduced waiting time between processing-heavy tasks
- Reduced contention from shared processing demand
- Improved throughput for high-volume automation workloads
- More consistent performance for recurring Rapid4Cloud usage
- Better support for time-sensitive implementation, testing, migration, and reporting activities
- Fully managed by Rapid4Cloud – no infrastructure overhead for customer teams

PRICING

\$1,599

PER MONTH

Optional premium add-on to your existing Rapid4Cloud subscription.

Ideal for customers running high-volume, recurring, or time-sensitive transformation and reporting workloads that benefit from dedicated processing resources.

INTELLIGENT CLOUD AUTOMATION FOR ORACLE FUSION CLOUD

Rapid4Cloud helps organizations automate and accelerate repetitive, manual, and time-consuming tasks involved in implementing, testing, migrating, and maintaining Oracle Fusion Cloud ERP and HCM

NEED DEDICATED RESOURCES FOR FASTER RAPID4CLOUD PROCESSING?

Talk to Rapid4Cloud about adding Performance Plus to your subscription and give your transformation and reporting workloads the dedicated capacity they need.
