# rapid 4Cloud

Upgrading your E-Business Suite solution to Oracle Fusion Applications is a major business decision, steeped in irony. By their very nature Oracle's Cloud Applications promote the adoption of constant innovation in small, digestible amounts, and yet the upgrade projects are typically lengthy and disruptive. Many companies do not have the appetite or capacity for such a major business transformation and consequently put off these large upgrade projects for as long as possible. Thus, they miss the out on the virtuous cycle of business improvement that Oracle Fusion Applications deliver.

Upgrade from Rapid4Cloud, a module of our SaaS Intelligent Cloud Automation Suite, dramatically reduces the time, cost, risk and disruption of these projects. **Upgrade** will analyse your legacy EBS configuration, map that to the Fusion Application functionality and automatically configure your Fusion solution – whilst giving you the opportunity to change processes if you so wish. It provides a series of reports to you outlining where the solutions don't match i.e. you have made modifications to E-Business Suite, Fusion functionality is different etc. This then becomes the focal point of the project.

With Upgrade from Rapid4Cloud, you can dramatically reduce the time and effort required to move from E-Business Suite to Oracle Fusion Applications.

KEY FEATURES

Automatically map EBS to Fusion Applications

8 detailed reports on the similarities and differences between your EBS solution and Fusion

RPA emulates human input, thereby respecting Oracle's security and data validation capabilities

Setup, Master and Transaction data can all be managed with the same tool

True SaaS solution – no software to install, no implementation cost

Implementation

Start
Quickly configure a new Cloud instance using a simple questionnaire

Upgrade
Use EBS setups and data as a template to create new Cloud instance

Rollout
Create a master template and automatically roll out to another country or business unit

Reports
Generate industry standard BR100 reports, export in multiple formats and compare

Quarterly

Copy
Automatically copy your Setup, Master and Transaction data between environments - DEV, TEST, PROD

Change
Ad-hoc changes, changes by module, loading large data volumes

Daily

BENEFITS

✔ Massively reduce time-to-benefit of upgrading from EBS to Fusion

✔ Cut costs, save time, focus on the processes that make your business unique

✔ Big "T" or small "t" – you control what sort of transformation you want

INTELLIGENT CLOUD AUTOMATION

Designed for both new and existing users of Oracle Cloud Applications, R4C saves time and improves data quality whilst freeing up resources to focus on high value add activities. With Artificial Intelligence and Robotic Process Automation technologies at its core, R4C is a software suite designed to automate and accelerate the many repetitive manual processes involved in implementing and maintaining Oracle Cloud Applications. This is what makes the R4C solution key to maximising the benefits of the Oracle Cloud.
